MITCHELL LEWIS & STAVER
PUMPS, MOTORS, CONTROLS

QUALITY, SINCE 1882

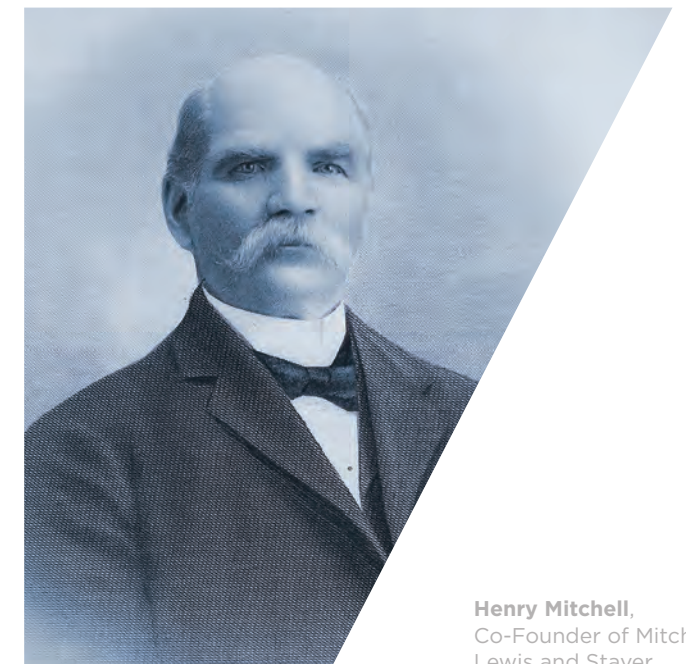

Mitchell Lewis & Staver is a leading distributor of pumps, motors, controls, packaged systems and custom engineered solutions.

We are built on a legacy of commitment to technical excellence and are driven by the success of our customers.

Our commitment to you, our customer, goes beyond the sale. Understanding your specific needs, providing you with options, and ultimately bringing you the best solution is the way we do business.

Connect with our in-house "Go-To Pro" product specialists who draw on a wealth of industry experience and knowledge, engaging projects of all scales and complexities.

Efficiency, dependability and value guide our efforts in serving every customer, every time.

Henry Mitchell,
Co-Founder of Mitchell
Lewis and Staver

RESIDENTIAL WATER SYSTEMS

On-time delivery. Uncompromised selection. Exceptional customer service. Mitchell's distributes the market leading residential water system brands and will assist in your project every step of the way.

Contact our team today for more information on all our available product lines.

Brands vary by location.

Depend on Mitchell's for industry leading brands of pumps, motors, controls, quick ship components and accessories for residential applications.

Our in-house product specialists are available to help you with pump sizing, diagnosing and troubleshooting water well issues, and ensuring you have everything you need - when you need it - to successfully complete any project.

Pentair Pentek IntelliDrive™ PID Variable Frequency Drive

Pentair Sta-Rite J Series High Head Centrifugal Pump

Goulds Self Priming Centrifugal Pump GT IRRI-GATOR

Each of our convenient locations features fast and friendly service and an expansive inventory of residential and irrigation product lines, including:

- Submersible Pumps, Motors and Control Panels
- Accessories, including Pipe, Wire, Pressure Tanks and Drilling Products
- Sump and Dewatering Pumps
- Delivery Service
- Hot Shot Trucks

AGRICULTURE AND IRRIGATION

Each solution we provide is uniquely designed for maximum efficiency, performance, reliability, and above all, value. Our engineering staff can design and build a custom agricultural system to meet your needs.

Contact our team today for more information on all our available product lines.

Brands vary by location.

For more than a century, Mitchell Lewis & Staver has been a knowledge leader in the ag space. Our technical experts understand the unique challenges inherent to moving water across the diverse geographies found in North America and the experience to provide you the most efficient pumping solutions possible.

Depend on Mitchell's for innovative solutions in all manner of pumping systems, from vertical turbines and submersibles to centrifugals and packaged systems.

Pentair Berkeley
B-Series Centrifugal Pumps

Goulds
L-Series 6"
Submersible Pumps

US Motors
Vertical Hollow Shaft Motor

With build centers throughout our footprint, our product engineers design a system to meet your requirements, then our highly-skilled technicians machine the pumps to meet your schedule.

- Vertical Turbines, Boosters, Centrifugals and Submersible Pumps & Motors
- Custom VFDs and Electrical Controls
- Packaged Systems and PTO Pumps

WASTEWATER SOLUTIONS

Whether you require a specific type of pump or a complete packaged system, Mitchell's offers an assortment of quality products and the technical expertise for your wastewater needs.

Pentair Myers
CE, CMEP & CMW Duplex
Electrical Control Panels

Mitchell's experts can help you select quality products that meet your needs and add value to your system.

Wastewater projects range in scope and size from a simple sump pump, to complex dairy systems, up to full-scale industrial projects. Whether you need quick access to inventory, assistance in engineering a sewage lift station, or all points in between, our product specialists will help you to determine the right solution for your next wastewater project.

- Reverse Osmosis
- Cranes / Winches
- UV Disinfection Equipment

MITCHELL GENUINE CONTROLS

Whether your job requires an off the shelf solution or a custom control panel, Mitchell Lewis & Staver has a solution to meet your precise specifications across a variety of industries and applications

Contact our team today for more information on all our available product lines.

Brands vary by location.

Our state-of-the-art facility manufactures both standard and custom control panels per UL508A or UL698A standards. Our panels use only high-quality Danfoss/Vacon variable frequency drives (VFDs) and range in size from 5hp to 1,300hp and beyond. We offer a full array of built-in features including filtration, programmable logic controllers (PLC), touchscreen operation interface, telemetry options and multiple communication protocols.

Mitchell's Controls provides full panel customization, system testing, technical assistance, product training, and follow-up support.

MITCHELL'S PACKAGED SYSTEMS

The process of product sizing, system engineering and fabrication is more effective when it comes from a single source, and that source is Mitchell Lewis & Staver.

Does your project require a pressure booster, lift station, dewatering solution, mixing station, or wastewater handling?

Whatever the application or industry, our engineering team will design and build a system to meet your unique requirements.

Contact our team today for more information on all our available product lines.

Brands vary by location.

As an OEM, we represent many major manufacturers, allowing us to select the best combination of performance and energy-efficiency to meet your exacting project objectives and specifications.

- In-house engineering staff for design, fabrication and testing
- Single source project responsibility
- Custom equipment integration, start-up, training
- O&M manuals and submittal generation
- International export services
- CAD drawings and general equipment layouts for visual confirmation of design commitments
- Multiple authorized build centers
- OEM UL 508A and 698A motor control panel integrator
- Distributor access to many industry standard pump manufacturers
- Integration experience with all applicable pump styles

GO-TO PRO SERVICES

Whatever your project need - large or small - Mitchell's local team is supported by our experienced Pros to help find solutions, assist with start-up, commissioning and provide post-sale support.

Learn more about Mitchell's Go-To Pro Service at gotopro.mitchellewis.com

As your complete, solutions-focused partner, Mitchell's offers a wide range of professional services, including project engineering, custom system manufacturing capabilities, and highly experienced repair staff.

Understanding your specific needs, supplying you with options, and ultimately bringing you the best solution is the way we do business.

Our Pros draw on a wealth of industry experience and knowledge, engaging projects of all scales and complexities.

HERE'S WHAT OUR PARTNERS SAY

WaterTec

Design and supply equipment for agriculture, horticulture and commercial greenhouse systems.

The key to being a leading supplier to greenhouses is to be constantly thinking about efficiency and innovation. Product quality and technical support were key factors in our decision to partner with Mitchell Lewis & Staver.

The transition to becoming one of North America's largest Greenhouse Irrigation and Water system design and supply companies has been helped by the expertise and professionalism of Mitchell Lewis staff and Packaged Systems department. Working together and finding the optimum solutions for the specific task or demand has been instrumental to the successful completion of many projects.

Rich Greig, President

Water Associates

Power equipment for water systems to permanent crop farms, city water districts, and reservoirs.

As our industry moves toward cutting-edge technology to support water conservation and tightening regulations in the state of California, we looked to the team at Mitchell Lewis & Staver Controls Department to design and develop custom controls that integrate system monitoring and automation through remote Bluetooth technology.

The relationships we have with Mitchell Lewis & Staver go beyond business to trusted friends. Our business depends on fast and reliable service and we appreciate people who will load up a motor in their truck and deliver at a moment's notice. To us, trusted partner goes both ways, we trust them, and they trust us. If there is ever an issue, they are right there to support me and fix the issue immediately.

Tom Mettler, Partner

Go-To Pro Solutions:

- In-house Product and Application Specialists
- Pump Design and Application Selection
- Multiple Pump Build Centers
- In-house Engineering Department
- Custom Packaged System Design and Manufacturing

- Standard and Custom Controls Manufacturing Facility
- Remote Monitoring Solutions
- Start-up and Commissioning
- Post-Sale Support

Since 1882, Mitchell Lewis & Staver has focused on technical expertise, superior service, quality products, and dependable delivery; making them today, the leading distributor of value-added pumps, motors, controls, packaged systems and custom engineered solutions for residential water, wastewater, agriculture, irrigation, commercial and industrial applications.

With multiple locations spanning across more than 12 states, and a state-of-the-art UL 508A manufacturing facility where in-house engineers design and build quality standard and custom control panels and packaged systems, Mitchell Lewis & Staver develops innovative solutions in collaboration with customers that help save energy and conserve natural resources.
